1. Executive Summary

1.1. Overview

Gold Lip Health & Fitness Center will be the first of its kind in Chennai brought to you by Scimores Corporation – a Venture Capital and Private Equity Organization with the ultimate objective of bringing the world class fitness products and facilities to Chennai.

Amid the hectic pace of the city, Gold Lip Health & Fitness Center will be an escape to a calm, peaceful environment dedicated to fitness and relaxation. Inside you will find a professional and dedicated staff who will provide you with caring and efficient service, creating a stress free atmosphere. Whether relaxing with a massage or participating in a fast paced body sculpting, we will deliver an unsurpassed standard of excellence that cannot be duplicated

2. Company and Product Overview

2.1. Company

Gold Lip Health & Fitness Center will be promoted by Scimores Industry of Fashion – a division of Scimores Corporation that will be focussing on fashion and health related products and services. This include franchising and/or promoting world class clothing, accessories, face.skin.body.spa brands within India and abroad.

Similarly, we would be focussing on premium projects in the area of Real Estate, Recreation & Hotels that are of world class standards, and most importantly not market driven and have a minimum profit of Rs. 5 cr annually over and above the invested capital, with absolutely zero risk ensuring max ROI for shareholders.

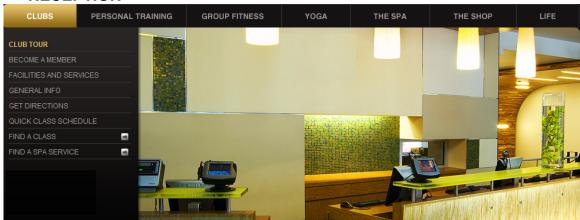

We will be executing them under the following line of business for effective managing and reporting.

1	SCIMORES Information Technologies
2	SCIMORES Architectures
3	SCIMORES Recreation and Hotels
4	SCIMORES Industry of Fashion
5	SCIMORES Educational Sector

2.2. Product (Gold Lip Health & Fitness Center)

The following pictures are not that of Gold Lip HFC, but are presented here for a brief understanding of the standards that the new facility will not only match up, but will also exceed providing a wonderful, pleasant and soothing experience.

3. Market Analysis

3.1. Market Opportunity

There isn't a single complete facility at this point in Chennai that we could actually compare with the numerous that are available in advanced cities like Manhattan, London or Singapore.

Clients served would include highly established people in business and entertainment such as Movie, Media, Modelling, Sports, Airlines, Business Men/Women, Corporate Executives, Various Embassy Communities, & their next generation youngsters. There's an unprecedented awareness and desire among these professionals and youngsters for a great body, and good skin in order to carry themselves with style and confidence. It's an industry that's still untouched, specially in Chennai.

The facility is planned for 1000 membership capacity in one of the posh locations possible so it is easily commutable from residences within, & nearby

We are the first of its kind. We have our premium clients around. We should be able to achieve our numbers within a short period.

Best of all, the buzz that the above facility around NGM, Alwarpet or Chetpet would bring in terms of it's sheer stature, clientele, and media would be overwhelming.

3.2. Competition

None in the premium category except for FitnessOne who are decent but very small and very limited to two 800 SF gym space and one 500 SF Studio @ Rs. 2000/month with other fitness programs such as aerobics and yoga charged separately @ Rs.1000/month.

3.3. Marketing Strategy

We have an effective branding and marketing process planned that will create a bold unique identity through engaging the best Marketing Strategy Partner specializing in Health & Fitness Products and Services, followed by intensive 3 months advertising on local TV Channels and in popular News Papers and Magazines.

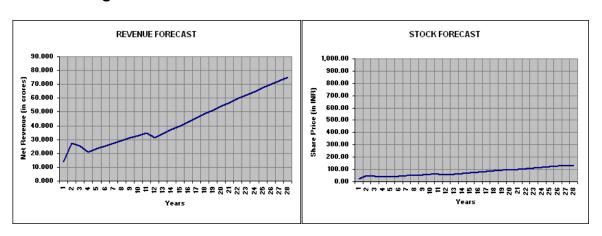

3.4. Market Research

In terms of market statistics, this booming industry is conservatively estimated at Rs.3,000 crores, and growing at a staggering rate of 100% year-on-year. And that's a fraction of the gigantic unorganized sector. As consumers get better informed and are increasingly willing to pay a premium value for a premium offering, the opportunity is only going to get bigger and better! - bolstering our instincts and belief.

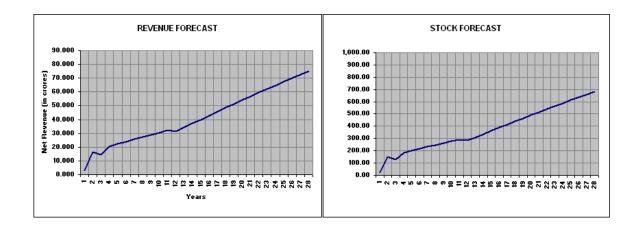

3.5. Financial Forecasts

4.2. Distribution

Through intense advertising on TV Channels and in popular News Papers and Magazines.

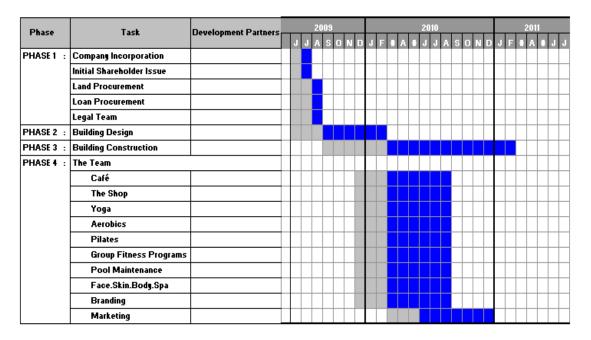

4.3. Promotions

Through intense advertising on TV Channels and in popular News Papers and Magazines.

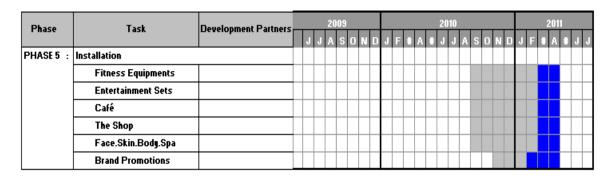

5. Operations Plan

5.1. Product Development

We would be partnering with the best in the industry for development, and for operational support. The development partners will be finalized & published in the final plan due June end.

5.2. Manufacturing

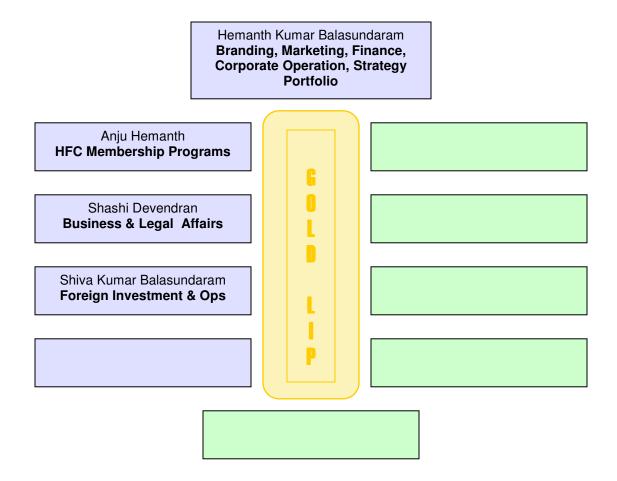

5.3. Maintenance and Support

Resources will be employed full-time to carry out the daily maintenance and support requirements of the facility.

The technical support will be provided by the respective development partners listed above as per the warranty and contractual agreements.

6. Management Team

6.1. Organizational Chart

6.2. Policy and Strategy

- Projects undertaken should produce a net profit of a minimum of Rs. 5 Cr annually over and above the capital gains.
- Each project will be reviewed and approved by the Board of Directors upon careful evaluation of the complete Business Plan.
- 40% of the net profit will be reserved for corporate operations, and the remaining 60% will be paid as dividends to investors.
- Quarterly Reports and Meetings to keep the shareholders fully informed of the projects, finances, and other key initiatives.

7. Financials

7.4. Break-Even Analysis

The break-even analysis is shown in <u>section 7.3</u>, where the break-even years for the investors and the corporate are highlighted in BLUE and GREEN as per the below Legends.

- Development Completion Yr
- Investors Break Even Point
- Corporate Break Even Point

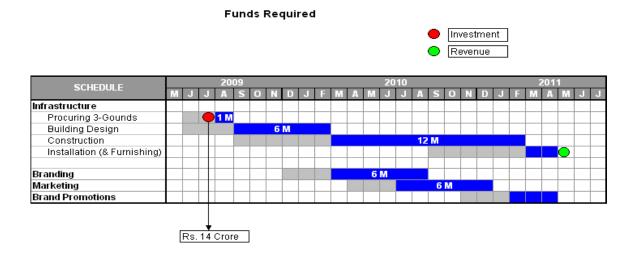

8. Funds Required and Uses

The capital structure required for the project is planned around equity:debt ratio of 20:80, although the required equity fund presented below is based on 30% Margin and 30% collateral per the present bank norms @ 12% interest rate. But following few initial discussions with the bank, the above numbers are workable depending on the location, land, and the building structure. We are targeting for 20% margin and 0% collateral in order to reduce the capital required to around 7 crores.

Advantages:

- 1. The funds we would need to generate is low, and can be managed easily through the Initial Shares Issue .
- 2. Would keep the number of shareholder's low, thereby maximizing the total shareholder's equity.

The below chart, and the following sub-sections describe how much money is required to finance the business, where these funds will be spent, when they'll be needed, and their potential uses.

8.1. Company Incorporation

Cost	Total	J
Incorporating		0.050

8.2. Fixed Asset Purchases

Fixed Asset Purchases	23.500
Land	12.000
Building Design	0.500
Architect	0.200
Interiors	0.100
Table Model	0.050
Computer Graphics	0.100
Estimation	0.050
Building Construction	5.000
Equipments	4.000
Fitness(Lease)	3.000
Entertainment	1.000
Furnishing	2.000

8.3. Working Capital

The following table shows the working capital we will use to pay short-term debts like salaries, branding, marketing, and other operational costs we will need to keep the business operating day-to-day before it starts turning a profit. The required capital will again come as a part of the Corporate Bank Loan.
